SPECIALIZATION

My passion has always been residential houses. Over the course of 20 years I've honed my skill set to make this area of architecture my expertise, investing in the infrastructure that will add the most value to my clients world wide.

INTERESTS

Lightweight steel structure construction

Energy efficiency in buildings

Modular & kit homes

Architectural visualisation software

JURIE VAN DYK ARCHITECTURE (PTY)LTD

Enriching lives through design

COMPANY PROFILE

Establishing his architectural practice in 1999 in St Francis Bay, Jurie van Dyk has more than 20 years experience designing luxury residential houses. A keen understanding of local coastal conditions is prevalent in his design aesthetic.

With a client base that is 80% non local or overseas, we have invested heavily from the outset in using technology to close the distance gap between us and our clients. Through the use of 3d technology and internet communications we have, on numerous occasions, only met the client in person on completion and hand over of the completed building.

Our office currently resides in Jeffreys Bay.

DESIGN PHILOSOPHY

“All we are doing is stacking bricks, its how we stack them that creates value”

Clients are unique, they have a very good idea of what they like, they just don't know how to put it all together. As a designer I believe it is my job to take all the clients design information and create a unique new style for each project, something much greater than the client can initially imagine.

ARCHITECTURAL SERVICE

“You should never have to deal with the building industry. As your Principal Agent I will take your project from design inception to final completion of building.”

We do not have a standard service that we provide, rather we listen to our clients' needs and put a customised solution together that will provide the most value to them.

Services include:

- Designing & 3d modelling of design ideas with clients
- Handling other consultants
- Being principal agent on the client's behalf
- Site inspections & reports
- Rational energy designs for cost saving and SANS 10400 compliance
- Payment certificates and contract administration
- Work with local authorities to procure all necessary permissions

GALLERY OF WORK

Because of a hacking incident our website is currently hosted at <https://jurie.weebly.com>. Hopefully it will be back at www.jurievandyk.com soon. Please visit our website and see some of our latest works and 3d design videos on display.
